

Sprint Review 04

1. What went well

- Complete some functions: basic booking,
- Complete UI prototype
- Complete UI:
 - Chat
 - Notification

2. What went wrong

- Take some time to resolve all conflicts in implementation
- Projects overwhelming

3. What problems and what caused the problems

- Do not have enough time to do tasks
- Coding each task takes more time than expected
- Have no time and have not organized the group timetable well to spend time on completing all the tasks

4. What can be done differently in the next sprint to improve the project

- Better organize the order of the task to make sure all the sections could be done in the designated time.

5. What lessons we could learn

- Need to work harder
- Arrange time more suitable to complete tasks
- Practice and explore knowledge whenever we can
